

Virtual Commissioning Services

Find ways to **reduce energy** use without disrupting daily operations.

Finally, an energy audit that works around your business. BGE and Power TakeOff provide **remote energy audits at no-additional cost** through our Virtual Commissioning (VCx) Services Program.

We work entirely from smart meter data—meaning no site visits, no scheduling disruptions, just expert advisors delivering recommendations tailored to your facility.

Data analysis

We'll remotely analyze your smart meter data to track when and where you're using energy most.

Customized recommendations

Your advisor will provide a list of no- and low-cost measures you could implement in your daily operations to reduce energy use and save money, like:

- **Optimizing equipment schedules based on occupancy**
- **Managing equipment startup and shutdown schedules**
- **Identifying equipment setbacks targeting excess consumption**

VCx participants **reduced their energy** usage (kWh) by an average of **15%¹**
